**Subject:** ExParte Filing in WT Docket 06-49 re: M-LMS NPRM

**Attachments:** SSF.THL.et.al,06-49,4.29.09.pdf; SSF et. al. Attch 1 - FHWA HALO.pdf; SSF et. al. Attch 2 - NIST HALO.pdf; SFF et. al. Attch 3 - 2008 Fed Radionav Plan.pdf

Dear Commissioners' advisors and FCC staff:

Please see attached ex parte written presentation filed on April 29, 2009 in the M-LMS NPRM, WT Docket 06-49.

We attach here the main presentation and its three exhibits.

The exhibits, summarized in the presentation, are:

- Two technical and public-policy presentations from the University of California's ITS center, PATH, co-authored by the undersigned (Warren Havens), to, and in response to solicitations from, the Federal Highway Administration and the National Institute for Standards and Technology,
- Along with an annotated copy of the 2008 Federal Radionavigation Plan (DOD, DHS, DOT) which supports the UC PATH presentations.

This presentation and its exhibits demonstrate, by the positions of principal authorities in GPS and ITS in the nation, the compelling need to maintain the current M-LMS rules for the nation's emerging, critical Intelligent Transportation Systems (ITS), one of the major infrastructure programs of the Obama Administration and Congress.

We have in the past and will continue this year to meet on these matters with members of Congress and their staff, and leaders of Federal agencies involved with ITS, along with our expert advisors and associates at the University of California Berkeley (California State DOT funded), ITS America, and ITS California.

When next visiting DC for these purposes, we will request short meetings with you as well.

A copy of this email will be filed on ECFS in this docket marked as an ex parte presentation.

Sincerely,

/s/

Warren Havens
